

Forest fires in Portugal

R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
Forest.fires.in.Portugal. <- read.csv("C:/Users/mavul/Downloads/Forest fires  
in Portugal .csv")  
plot(Forest.fires.in.Portugal.$Temperature, Forest.fires.in.Portugal.$Wind)
```

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
